Bibliography and References

There is no single text or training program recommended by the NCCPT CB. The CPTE reflects practice in the United States as determined by the most recent Job Task Analysis. Obtention of NCCPT study materials is not a necessary prerequisite for passing the Final Exams nor is it required to have NCCPT study materials before taking the exam.

The NCCPT CBs item writers and examination development committee members frequently use the following texts as resources; however, the sources used are not limited to the books listed here. The list is not comprehensive and does not imply that references not included on this list are inappropriate or of lesser value or quality than references that are included. The list is presented to assist individuals in preparing for the examination; however, study of the following references will not guarantee that an individual will pass the examination.

- For the Certified Personal Trainer Credential (CPT)
  - Gollnick, PD, Hermansen, L. Biomechanical Adaptations to Exercise, Anaerobic
Metabolism in Exercise & Sports Sciences.

- Guyton, JG. Physiology of the Human Body. 5th, Baltimore, MD, Williams & Wilkins, 1976.
